-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. Claims 1-4 and 9-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Uemura et al (US 5,499,153).

The aforementioned claims recite the following features, inter alia, disclosed in Uemura et al: a head gimbal assembly having a suspension with a metal flexure bonded to a slider with a region on a slider bonding surface of the flexure is completely or *incompletely*, i.e., not removed at all or removed, to form a removed region; adhesive disposed between the film-removed region and the slider. The flexure is a u-shape through groove. No perforations are present in the etched region. See Figure 5 of Uemura et al. Claims 2-4 show method steps which impart only as much as the structure set forth in the claims

Art Unit: 2653

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have furnished the slider bonding surface with a film region. The rationale is as follows: one of ordinary skill in the art would have been motivated to furnish the slider bonding surface with a film region since one of ordinary skill recognized that the film provided a way of enhancing adhesion as was known to one of ordinary skill via the films.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to George J. Letscher whose telephone number is 571-272-7591. The examiner can normally be reached on a Conventional work schedule.
